

## ASSIGNMENT-4

### WEB APPLICATION WITH LOGIN, REGISTER AND HOME PAGES

Web application consists of three pages:

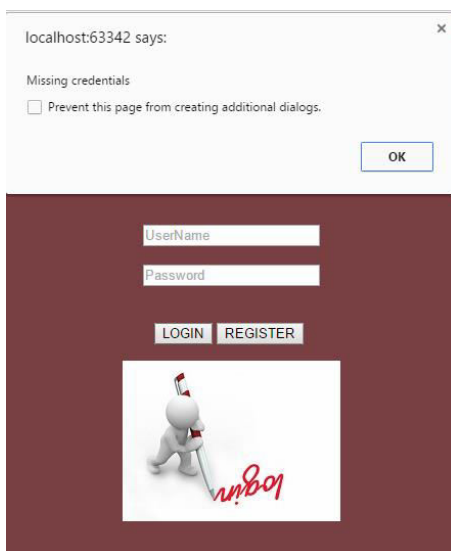

(a) LOGIN:

User can login in to the application with their credentials(username, password)

The screenshot shows a web page with a dark red background. At the top, the word "LOGIN" is displayed in bold, black, uppercase letters. Below it are two white input fields: "UserName:" and "Password:". Under the input fields are two buttons: "LOGIN" and "REGISTER". At the bottom, there is a white rectangular area containing a 3D white figure holding a red flag and a red signature that says "login".

If user enter wrong credentials, then an alert message appears on the screen with a message missing credentials.

The screenshot shows the same web page as before, but with an alert message box open. The alert message box has a title bar that says "localhost:63342 says:". The message inside the box is "Missing credentials". Below the message is a checkbox labeled "Prevent this page from creating additional dialogs." and an "OK" button. The web page content is partially obscured by the alert message box.

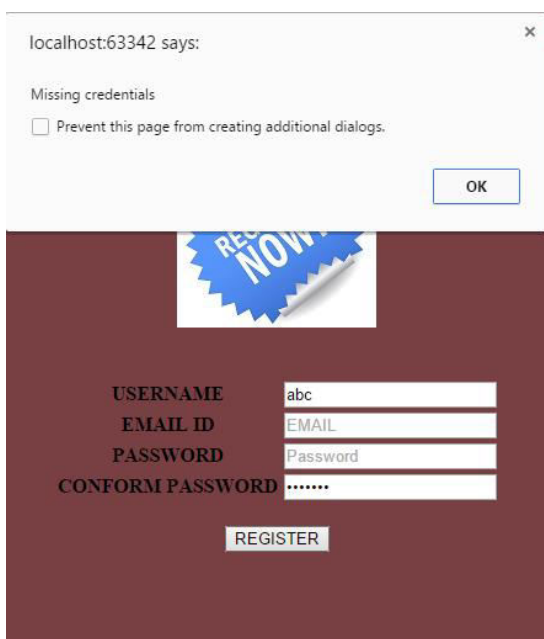

## (b) REGISTER

User can register for viewing the application by entering required details.

The image shows a registration form on a dark red background. At the top center is a blue starburst button with the text "REGISTER NOW!". Below it, there are four labels and their corresponding input fields: "USERNAME" with a field containing "UserName", "EMAIL ID" with a field containing "EMAIL", "PASSWORD" with a field containing "Password", and "CONFIRM PASSWORD" with a field containing "Re-Enter Password". At the bottom center is a white button with the text "REGISTER".

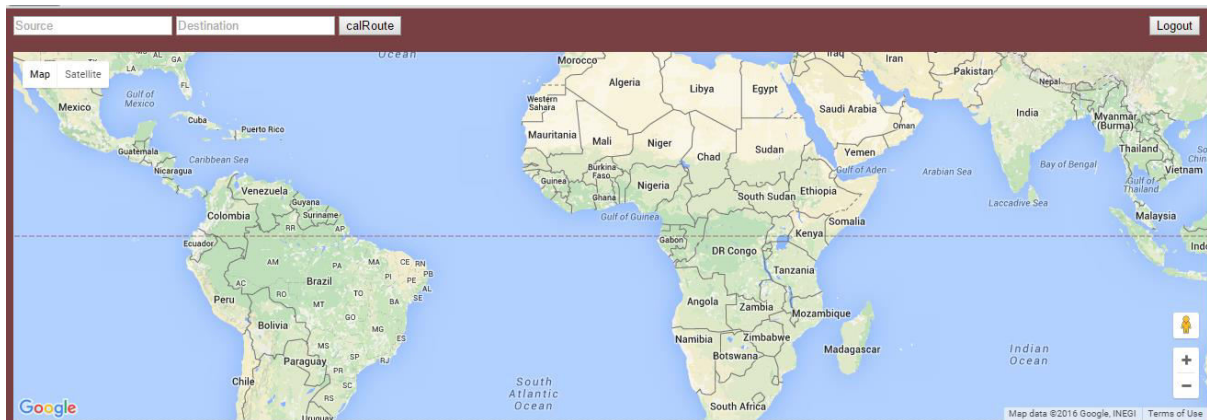

If user skips entering details then a alert message arrives on screen.

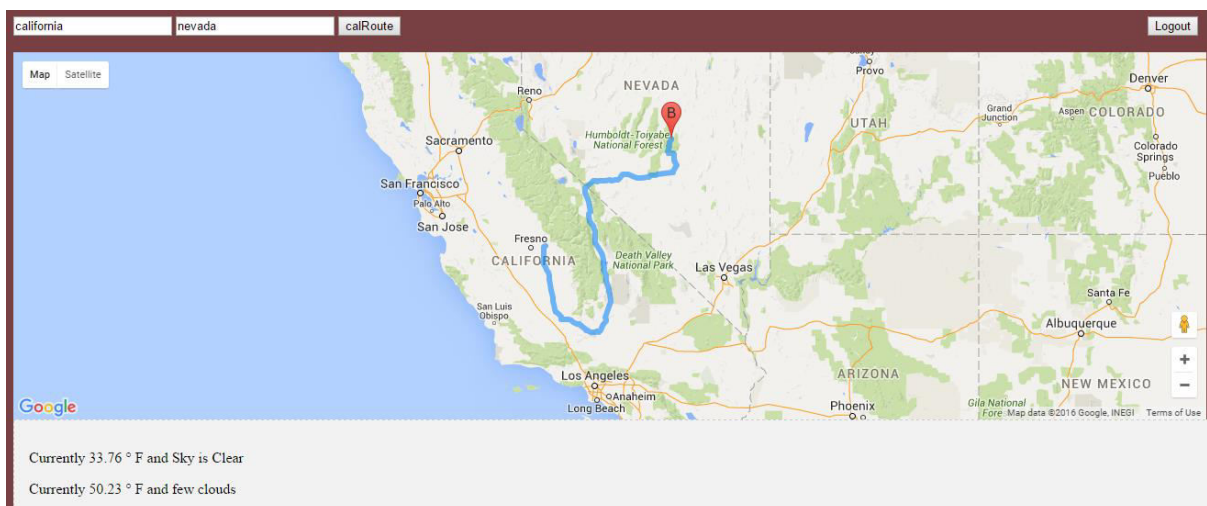

The image shows an alert message box on top of the registration form. The alert box has a title bar that says "localhost:63342 says:" and a close button. The message inside says "Missing credentials" and there is a checkbox labeled "Prevent this page from creating additional dialogs." with an "OK" button. Below the alert box, the registration form is visible. The "USERNAME" field now contains "abc", the "EMAIL ID" field contains "EMAIL", the "PASSWORD" field contains "Password", and the "CONFIRM PASSWORD" field contains ".....". The "REGISTER" button is still at the bottom.

### (c) HOME

User enters in to home page when login in to the application. Home page consists of map and two text fields for entering locations.

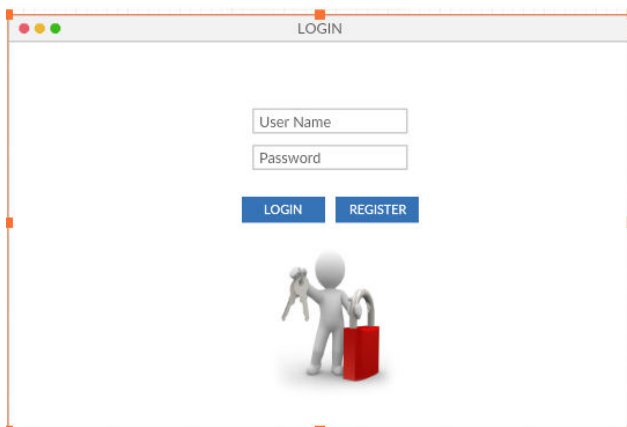

When user enters two locations and click on the button call route then weather report and direction between two places is displayed.
