

## ASSIGNMENT-7

Creation, Read, Update, Deletion of data are displayed using mongo database.

The html page is as follows:

localhost:8080/Assignment6/First.html

Enter Country Name  
  
SUBMIT

Enter Country Name  
  
READ

Enter Country Name  
  
Enter Value  
  
UPDATE

Enter Country Name  
  
DELETE

(a) When a country name is entered and submitted then it is created:

localhost:8080/Assignment6/Main

Country Name:BRL  
Value: 4.074

(b) When a country value is entered then it reads from the database and displays all the values of that respective country.

 localhost:8080/Assignment6/Main 

Country Name:INR  
Value: 73.684

(c) When a country name is entered , its currency value is entered then it is updated in to database and shows the result as updated on the screen and within database.

 localhost:8080/Assignment6/Main 

Country Name:BRL  
Value: 4.074

 localhost:8080/Assignment6/Main 

Country Name:BRL  
Value: 10.074

(d) When a country name is entered then the record is deleted from database.

The mongodb for my account:
